

Countdown to Launching Your CCBHC with Mary Givens

October 18, 2023

Agenda

- Introductions
- CCBHC Footprint
- CCBHC Experience Model

Stage 1

Stage 2

Stage 3

Stage 4

Stage 5

- Key Takeaways
- Q + A

Mary Givens

CCBHC Program Manager, Qualifacts

- ✓ 26 years' experience working in the field serving people with SPMI, I/DD and dual diagnoses.
- ✓ 16+ years at Qualifacts working in compliance and CCBHC.
- ✓ Also previously worked as an LPN, a behavior specialist, a supported employment specialist, a program director, and CEO of a nonprofit.
- ✓ Holds a Masters in Rehabilitation Administration from the University of San Francisco.

Deanne Cornette

Senior Associate, OPEN MINDS

- ✓ 25+ years' experience in behavioral and health care field.
- ✓ 20+ years developing and implementing co-occurring and integrated programming for nonprofit behavioral health, FQHCs, FQHC LALs and CCBHCs.
- ✓ An experienced executive providing leadership in roles including Counsel for Strategic Development and CEO of a consulting practice.
- ✓ Holds a Master's in Health Administration from the University of South Florida.

The Importance of CCBHCs

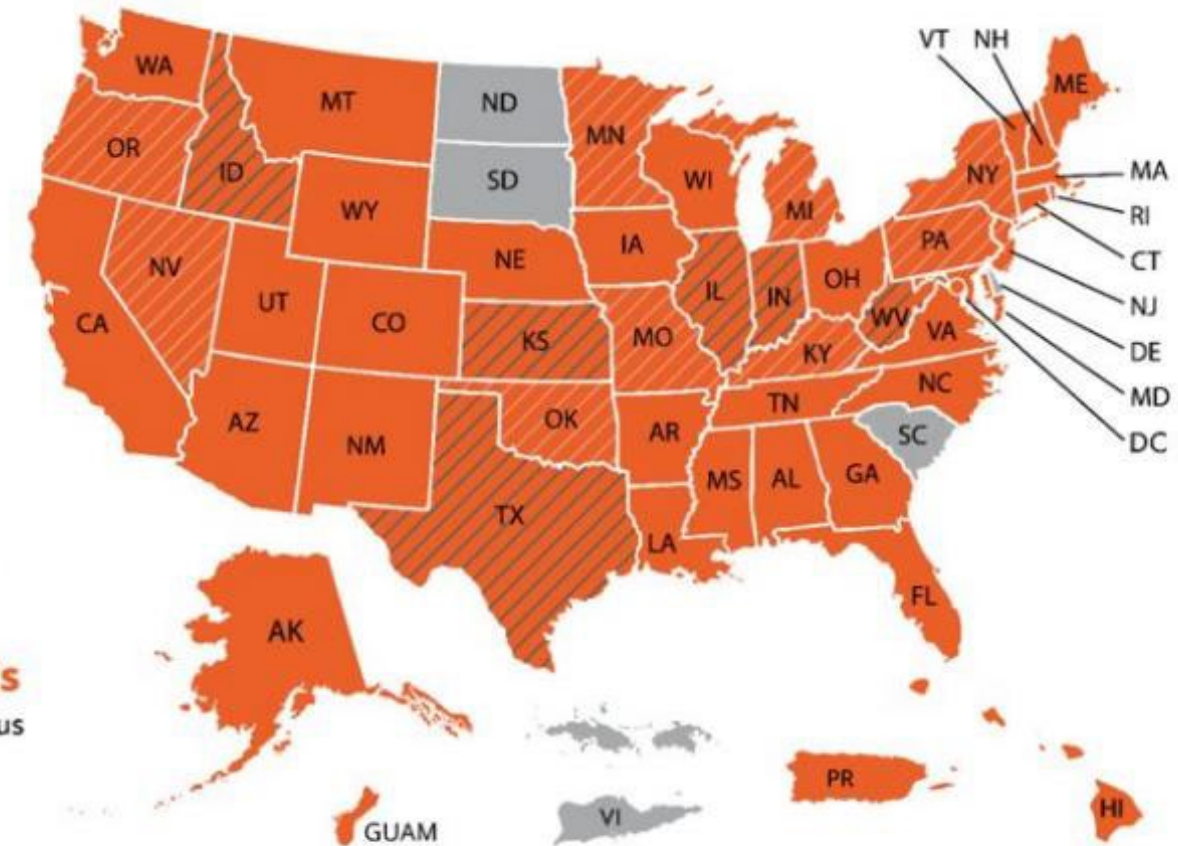

Value -Based Care is Here to Stay

Of the **500**
total CCBHCs,
Qualifacts supports
170+ (or 33%)
across **36 states**.

Status of Participation in the CCBHC Model

- States where clinics have received expansion grants
- States selected for the CCBHC demonstration
- Current (or working toward) independent statewide implementation
- No CCBHCs

Today, there are more than 500 CCBHCs and CCBHC grantees in 49 states and territories, including new grantees awarded in September 2022. This report contains data collected from CCBHCs and grantees that were active as of August 2022, covering 249 of 450 sites.

Activities

- Tasks that must be completed during this stage

Support

- Ways **the right partner** can support the CCBHC

Deliverables

- The deliverables or outcomes of each stage

Stage 1

Contemplation
and Planning

Stage 1: Contemplation and Planning

Suggested Internal CCBHC Committee Members

- “C” level member of leadership
- Designate a CCBHC Team Leader
- Human Resources Representative
- Clinical Manager
- Billing Manager
- IT Subject Matter Expert
- Report Writer
- Quality Assurance Representative
- Trainer
- Peer Professional

Staff Productivity

Assessments

What are SMART Goals?

Elements of a Staffing Plan

New Personas

Identify new personas to add to support new service types (MAT services, peer support services)

Staff

Identify additional staff to support greater access (therapists, case managers, front desk, intake persons)

Job Descriptions

Write job descriptions for net new roles or rewrite job descriptions for changes to current roles

Certifications

Attain certifications required such as MAT or peer certifications

Onboarding Process

Update onboarding process to include information about the CCBHC Treatment Model and KLAS

System Admin

Identify a system administrator and report writer ASAP

Adopt an Organizational Change Process

“Organizational change refers broadly to the actions a business takes to change or adjust a significant component of its organization. This may include company culture, internal processes, underlying technology or infrastructure, corporate hierarchy, or another critical aspect.”

Harvard Business School Online

Questions to Ask Yourself for Successful Organizational Change

1. Do you understand the forces making change necessary?

2. Do you have a plan?

3. How will you communicate?

4. How will you identify roadblocks?

5. Do you have the right team to execute the plan?

Stage 2

Funding and
La unch

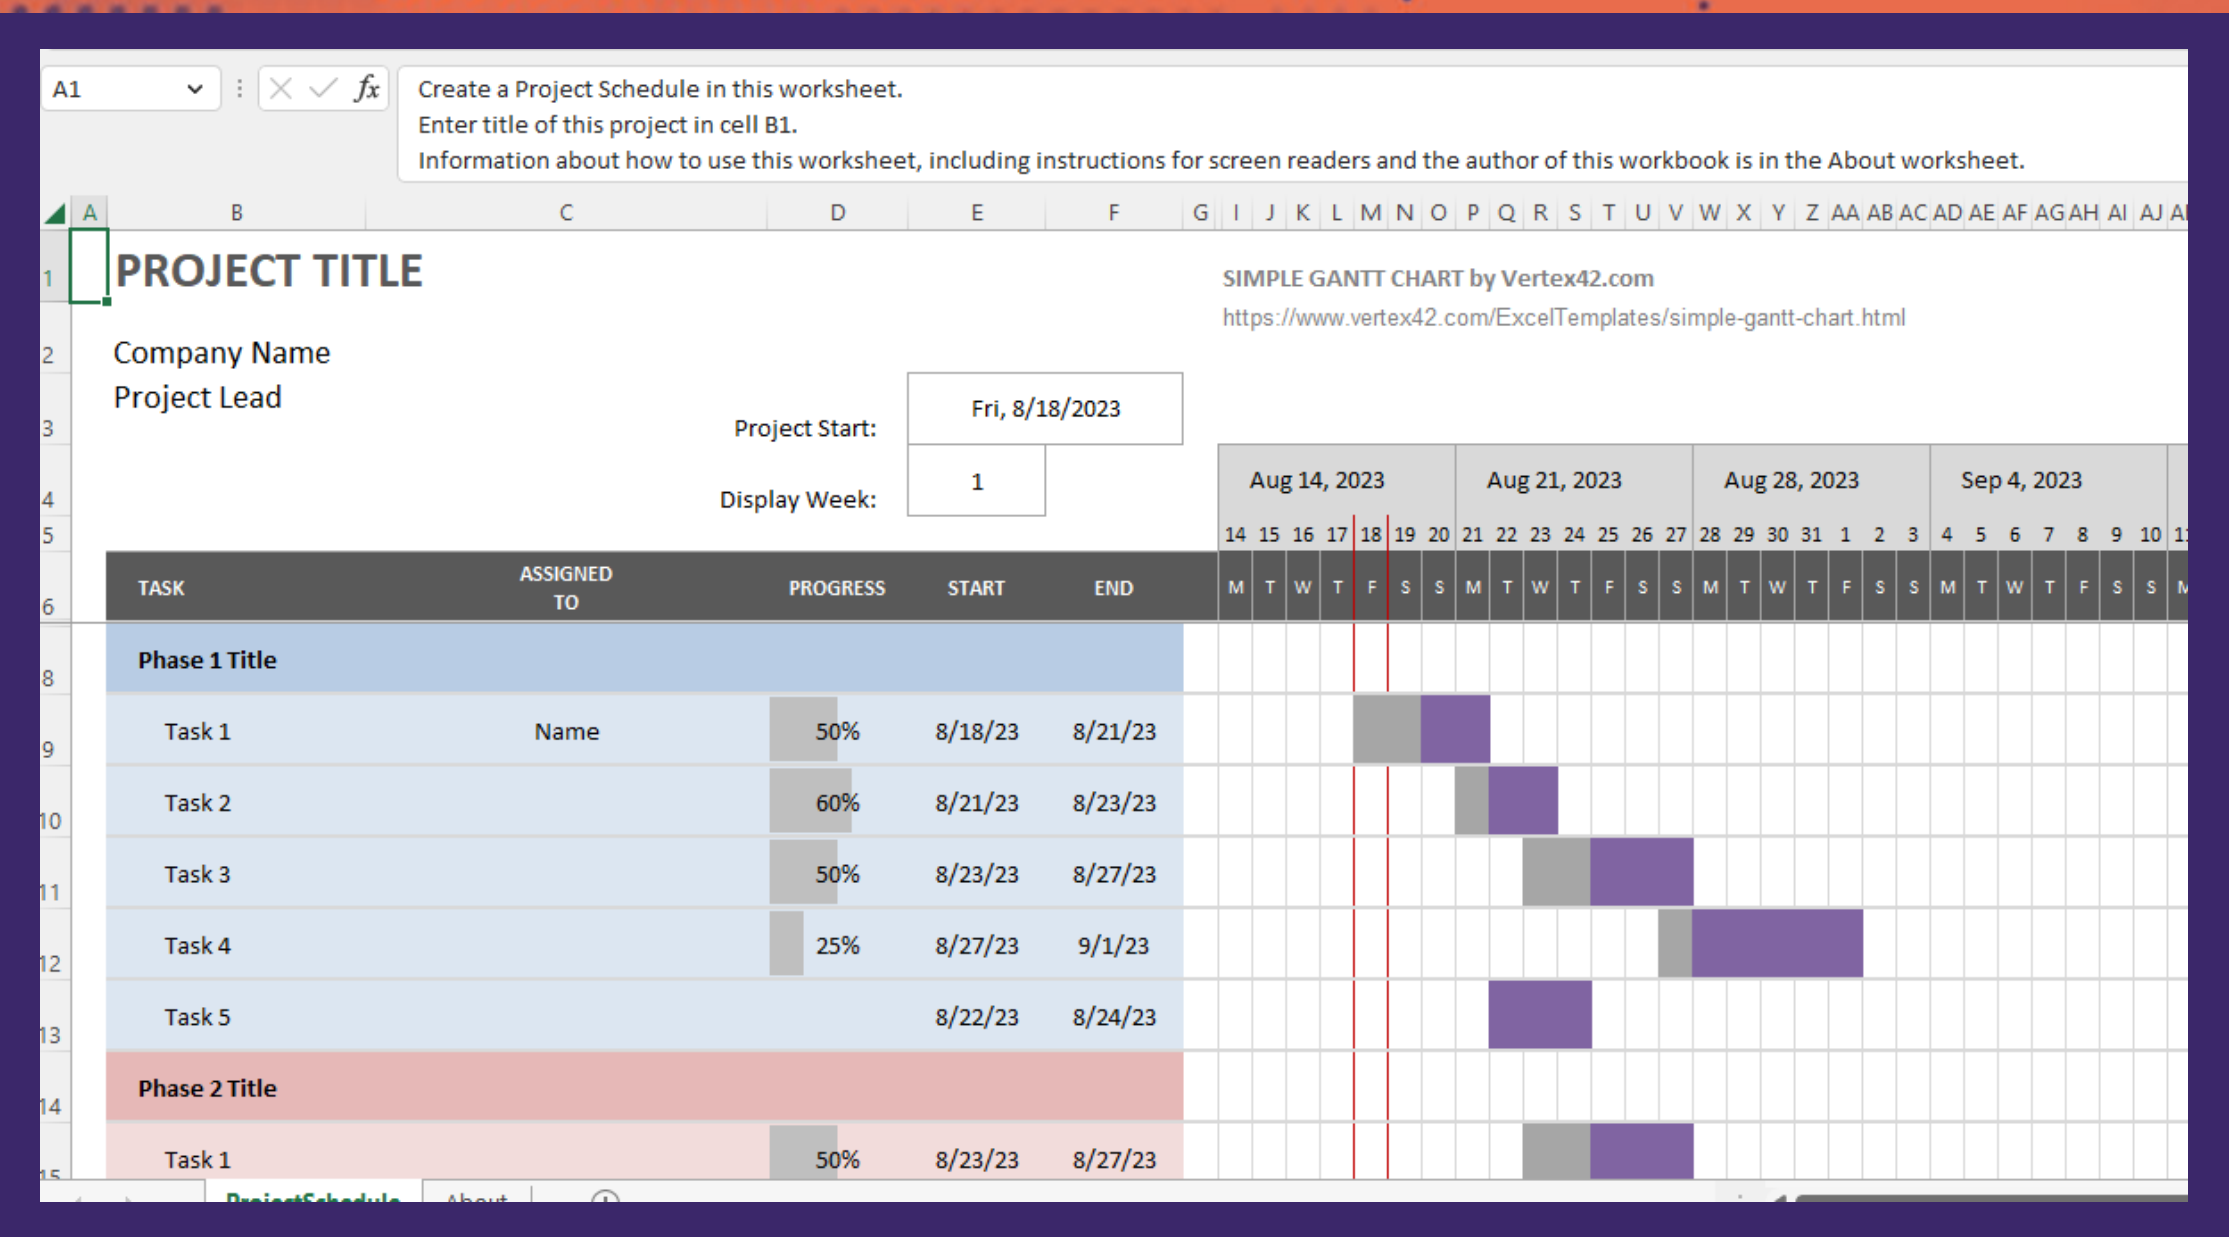

Stage 2: Funding and Launch

Execute the Memos of Understanding (MOU) for DCOs

A memos of understanding (MOU) is a legal document that is used between two parties who have a common goal or action they will be participating in.

Social Services

The Nine CCBHC Required Services

Stage 3

Certification or
Attestation and
Data Collection

Stage 3: Certification or Attestation and Data Collection

- **Submit Application for Certification**
- Update Project Plan
- Continue CCBHC build out (workflows, new programs, new services)
- Hire any additional staff
- Execute Marketing Plan for new services
- Run outcomes Report and PDSA- pivot accordingly

- Run CCBHC Operational Report and assess health of the CCBHC
- Check Status of MOUs
- Check Status of informal relationships
- Assess status of staff training
- Review CCBHC Readiness checklist
- Review goals/ objectives of program (proposal)
- Ensure Data Collection is in full swing

About The ONC Health IT Certification Program

The Office of the National Coordinator for Health Information Technology (ONC) Health IT Certification Program (Certification Program) is a voluntary certification program established by the ONC to provide for the certification of health IT. Requirements for certification are established by standards, implementation specifications and certification criteria adopted by the Secretary of the Department of Health and Human Services (HHS). The Certification Program supports the availability of certified health IT for its encouraged and required use under other federal, state and private programs. The Certification Program is a third party product conformity assessment scheme for health information technology (health IT), based on the principles of the International Standards Organization (ISO) and International Electrotechnical Commission (IEC) frameworks.

Health IT Certification Program Overview (PDF - 510KB)

Launched in 2013, the Certification Program supports the Promoting Interoperability (PI) Programs (previously Medicare and Medicaid EHR Incentive Programs) administered by the Centers for Medicare & Medicaid Services (CMS). While the PI Programs continue to require the use of certified health IT, the use of certified health IT has expanded to other government and non-government programs. The Certification Program has released three editions of certification criteria and regulations for non-accredited Certification Program requirements. These new editions of certification criteria include more robust technical and interoperability requirements, ONC Authorized Certification Body (ONC-ACB) in the field surveillance expectations, and cost transparency and disclosure requirements for health IT developers' certified health IT. These additional disclosure requirements have been adopted to ensure users of certified health IT are fully informed about certain types of limitations and additional costs associated with the ability to implement or use certified health IT in a manner consistent with its certification.

The graph below shows the organizational structure of the Certification Program. As illustrated, ONC manages the overall program while working with other agencies and entities in the following capacities:

ISO/IEC 17065

ONC "Program Owner"

Federal Register Title 45 Subtitle A Part 170

ISO/IEC 17011

NVLAP

Stage 4

Reporting and
Stabilization

Stage 4: Reporting and Stabilization

- Run operational and clinical quality outcomes reports
- Submit Progress Report including IPP measures if applicable
- Conduct PDSA analysis on results of progress report and pivot as indicated
- Look to stabilize final clinical outcome workflows

- Meet with Advisory Board, share progress, get feedback and input
- Begin to build your Continuous Quality Improvement Plan
 - Consult with QA Persona on CQI plan
 - Be sure to include data on consumer suicide attempts and death by suicide, and
 - Data on consumer 30-day hospital readmissions for psychiatric or substance use reasons

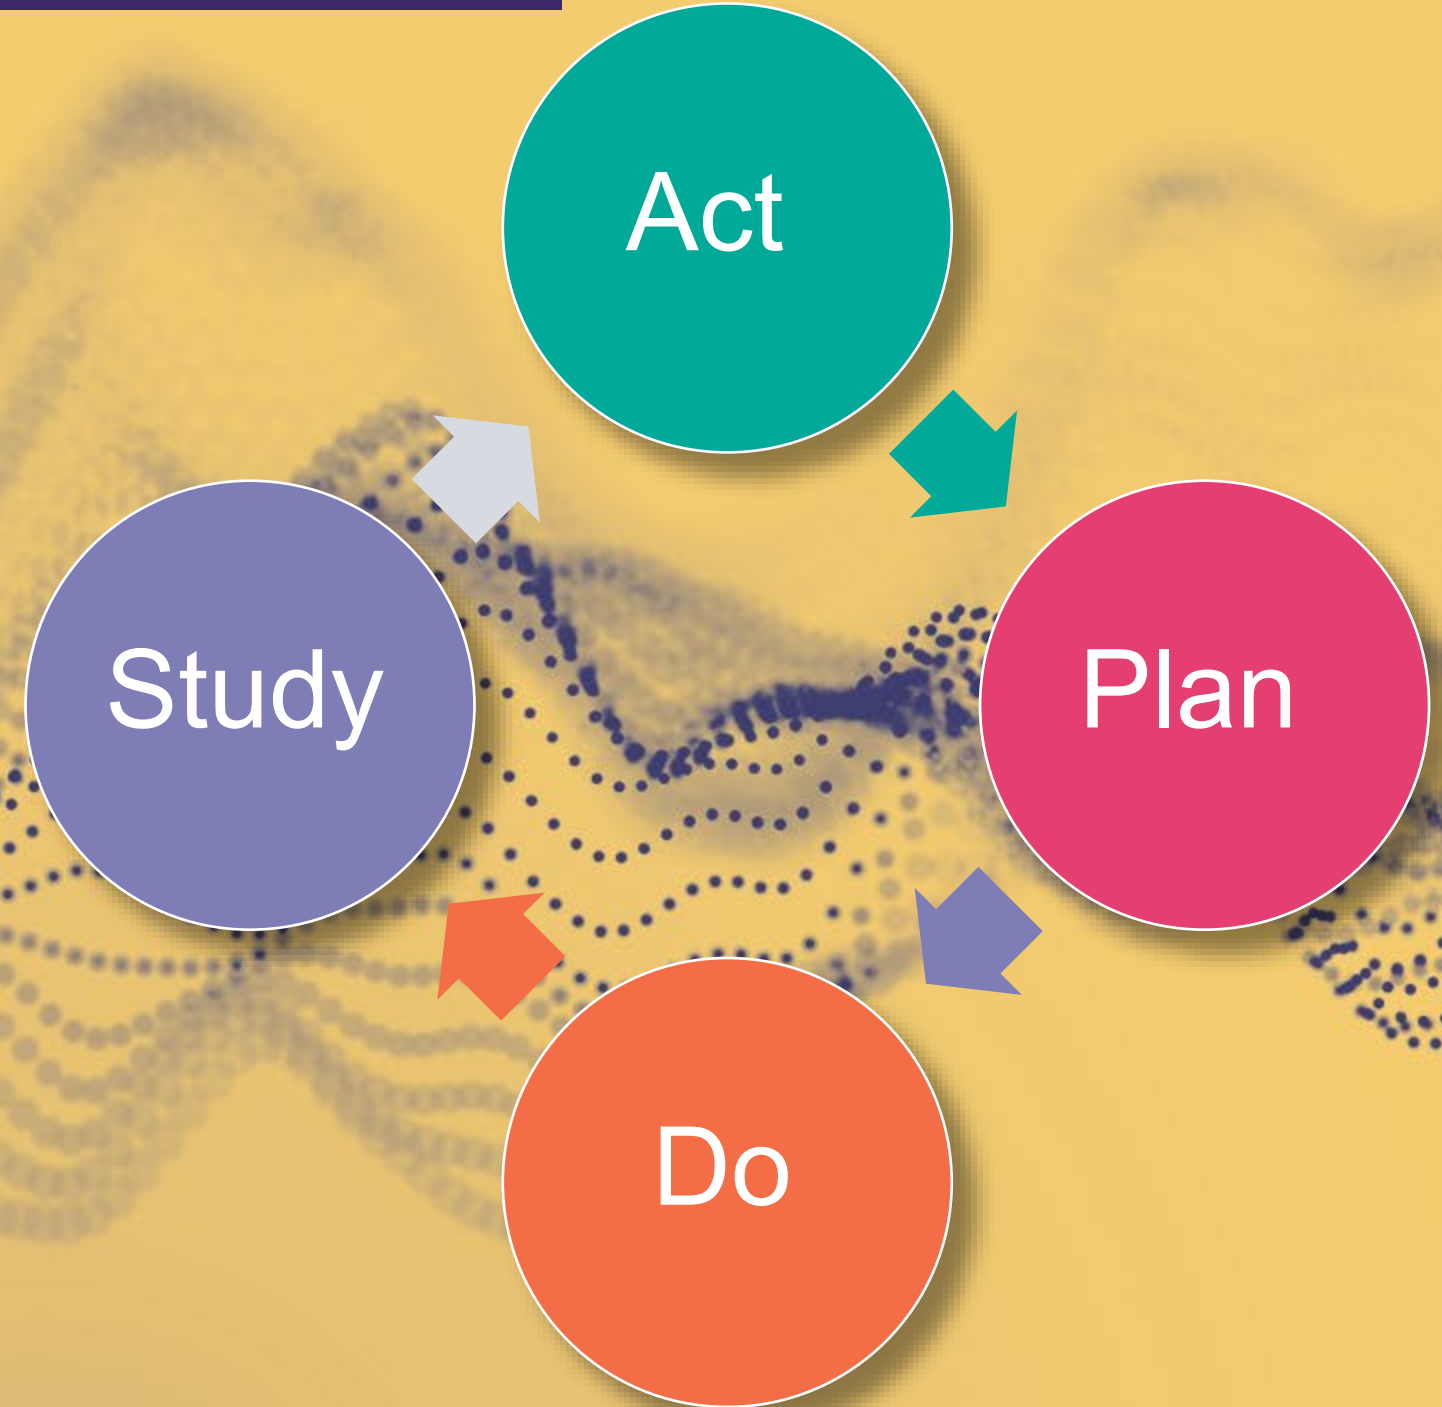

Ideas for Operational Reports to Consider

- Number of activities per day per client
- Types of activities per day by client, include diagnosis
- Average length of episode of care by diagnosis
- Demographic characteristics of clients in CCBHC
- Average number of days from first point of contact to initial evaluation
- Average number of days from Crisis to first service following crisis
- Number of services that include the use of EBPs
- Number of clients receiving mental health services under grant
- Average number of days from initial NOMS to Reassessment NOMS
- Number of billable hours per day by staff
- Number of clients on caseload by staff, include client diagnosis
- BMI of clients on specific types of psychotropic drugs, by drug
- Number of clients in each type of living status over a period
- Number of clients receiving SUD services under grant
- Percentage of CCBHC clients who are active military or veterans compared to community assessment
- Number of and named referrals from external entities
- Number of CCBHC admissions and discharges for specific period

Plan, Do, Study, Act

- What are we trying to accomplish?
- How will we know that a change is an improvement?
- What changes can result in improvement?

Stage 5

Continuous Quality
Improvement

Stage 5: Continuous Quality Improvement

- Finalize Continuous Quality Improvement Plan
- Complete Annual Cost Report
- Complete Annual Budget
- Update or review community Needs assessment and DIS
- Develop a sustainability Plan

- Conduct Consumer Satisfaction Survey annually
- Conduct PDSA assessment on clinical outcome measures and operational KPIs regularly
- Conduct PDSA assessment on operational KPIs regularly
- Complete chart audits regularly

Elements of a CCBHC Sustainability Plan

1. Focus on sustainability planning efforts that help achieve internal efficiencies, maximize billing and understand costs.
2. Capture and share compelling data to demonstrate the value proposition of CCBHCs and promote sustainability.
3. Build or expand community partnerships that can help champion the value of CCBHCs to state policymakers.
4. Work alongside other grantees and state associations to educate and communicate the value of CCBHCs and explore pathways for statewide implementation.
5. National CCBHC Expansion is a pathway to sustainability.
6. CCBHC can help prepare providers for APMs. However, these do not replace the need for a permanent state-led CCBHC model.

Patient Satisfaction Surveys - Why are They Important?

Let's patients know their opinion matters and you are listening

Gives patients a say in how you run your business and how you can serve them better

Can act as a diagnostic tool that can help increase patient safety and reduce liability

Can serve as a marketing tool. Happy clients tend to make positive references
